

Revit Professional Training

THE FUTURE OF ARCHITECTURE AND ENGINEERING IS BIM (BUILDING INFORMATION MODELING). REVIT® IS THE SOLUTION.

The College of Technology CAD Program is offering a week-long intensive Autodesk Revit® training for architecture and engineering professionals. With PPI Group's Eugene O'Day, students will receive introductory through advanced training in Revit® software which is the most popular Revit® class from one of the leading and most tenured experts on the Revit® product line in the Pacific Northwest. The students will learn about site design, phasing and design options, how to collaborate on a design, working with structural tools, view templates, and system families.

- Dates: January 16th – 20th
- Instructor: Eugene O'Day
- Textbook provided
- Price: \$1200
- Attendees: Architecture and Engineering Professionals from the greater Montana region
